

January 19th is NATIONAL TIN CAN DAY

This unofficial holiday was established to raise awareness on recycling and recognize the Tin Can. Take a minute to celebrate the Tin Can and learn three interesting facts about the 'can with a plan.'

- 1** When a tin bar is bent it will make a screaming sound called a "tin cry".
- 2** Tin cans have grooves giving them a corrugated look designed to add strength to the can.
- 3** Recycling steel and tin cans saves 74% of the energy used to make them from virgin material.
